CUTTING EDGE TECHNOLOGY To ASSIST CASE MANAGEMENT

A case management system helps you organize your entire operation: structure workflows with dynamic tasks, schedule meetings, and share documents with your clients. Operating quickly and efficiently is easy when everything is accessible in one place.

The system will allow client information, case information, correspondence and minutes to be held securely and accessed easily. Collaboration between team members will ensure that time and money is saved.

Product features

Secure, but easily usable systems based on existing technology and open source software.

Designed to the particular needs of the client, and to their budget with training and support.

Simple solutions with stable software, at a fraction of the cost we offer clarity and quality.

SERVICE	BUDGET COST	FULL SERVICE
Initial design and digitalisation of your practice	£2000 NB 20% charity reduction	£4900
Scaling up of existing systems, and integration with open source	£2800 NB 20% charity reduction	£7900
Production	£2800 See above	£8500 Inc staff training

* All costs will be confirmed at contract

Our design team will work with you to create a bespoke product at a fraction of the cost by brokering in knowledge, software, open source systems and solutions from other sectors and using them to create a suite of integrated systems which will meet your needs.

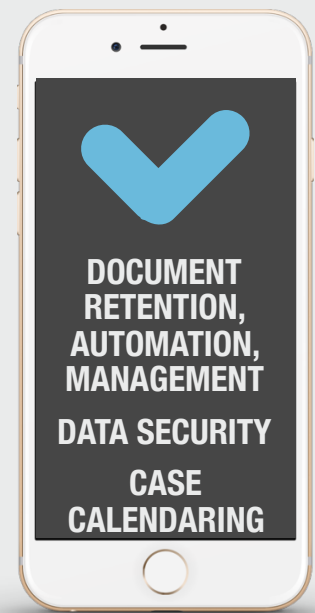

For small law firms, or human rights NGOs, law centres, advice services and other Third Sector groups which need to retain client information securely, to create work flow based case management systems and database linked document generation we provide the answers.

Safe Affordable Usable Solutions

The team at LEXXER Law have developed case management systems solutions, which fit both the needs and the budget of legal charities. From advice and law centres, support and advocacy groups through to international Human Rights NGOs we offer scaled down solutions which are tailored to the needs of the client.

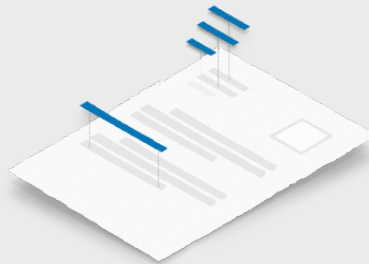

Our budget and full service products deliver all the tools that modern legal orientated organisations need to run a successful practice: calendaring, time-tracking, note-taking, document management, task management, legal accounting, bookkeeping, and billing. We offer this at a fraction of the cost by utilising and integrating our system seamlessly with other popular applications such as Gmail, Outlook, Dropbox, Toggle Capsule and Google Drive.

We utilise the best existing solutions and we've gone to great lengths to protect your data, including working with some of the world's leaders in Internet security.

Document Retention

Systems integrated with leading cloud storage services including Dropbox, and Google Drive. Access your documents, do research, collaborate with team members.

Document Automation

Instantly streamline and populate new documents using the automated document templates. With this automation feature, you no longer have to find and replace names and addresses manually.

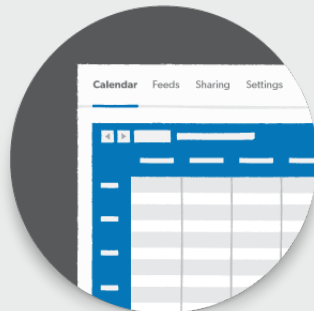

Document Management

Keep your legal files all in one place and search and organise your documents efficiently. Collaborate with your clients and keep track of changes and edits

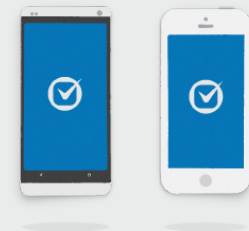

Data Security

We work closely with trusted third-party leaders in data security to rigorously ensure that your information is secure. Our motto is secure but accessible

Case Calendaring

Our legal calendar solutions allow you to keep track of each case's meetings and deadlines. You can share calendar entries and meeting reminders with clients and contacts.

Mobile Monitoring

From communications and email to time logging our integration of mobile technology will allow a small team to work remotely and efficiently.

Get More for Less with our Affordable Solutions

We will work with your staff to develop a system which suits you not try to make your fit our existing product. The systems we develop integrate your existing system, preferred software, and databases to bolt on new products which will add value and functionality.

Other we can make your processes better, your data safer, your systems more seamless and your clients more connected to what you do.
